

Supplementary Table 1. Two-way analysis of variance results on the influence of laparoscopic surgery and postoperative transfusion on the postoperative acute kidney injury

Variable	df	MS	F	p-value
Laparoscopic surgery	1	0.282	7.46	0.006
Postoperative transfusion	1	0.301	7.95	0.005
Laparoscopic surgery × postoperative transfusion	1	0.086	2.26	0.13

df, degree of freedom; MS, mean squares.
