Supplementary Table 2. Cox proportional hazards analyses of bicarbonate use for mortality

Model	Hazard ratio (95% confidence interval)	p-value
Unadjusted	1.72 (1.55–1.92)	<0.001
Adjusted[a]	1.72 (1.51–1.96)	<0.001
Adjusted[a] with propensity score	1.55 (1.31–1.84)	<0.001

[a]Covariates included age, sex, body mass index, diabetes mellitus, hypertension, cause of rhabdomyolysis, volume of fluid, peak serum creatinine level, and use of diuretics.
