

Supplementary Table 5. Comparison of mHTKV- α by MIC classes (A = 0 and K = 150) in a different ADPKD cohort

| Cohort | mHTKV- α (%/yr) | | | |
|---------------------|------------------------|----------------------|----------------------|---------------------|
| | Class 1B | Class 1C | Class 1D | Class 1E |
| TEMPO 3:4 (n = 447) | 3.25 (1.5–5.03) | 5.12 (4.35–5.9) | 5.62 (4.58–6.68) | 7.75 (6.16–9.35) |
| HALT-PKD (n = 247) | 4.91 (–1.8 to 0.66) | 7.17 (–2.13 to 0.04) | 7.55 (–2.8 to –0.27) | 8.6 (–3.57 to 1.18) |
| KNOW-CKD (n = 178) | 3.83 (2.62–5.05) | 5.26 (4.16–6.36) | 9.39 (5.3–13.49) | 11.72 (6.84–16.59) |

Data are expressed as mean (95% confidence interval).

ADPKD, autosomal dominant polycystic kidney disease; mHTKV- α , annual change to height-adjusted total kidney volume; MIC, Mayo imaging classification.
