

Supplementary Table 4. Cox regression model for anuria and mortalities in older peritoneal dialysis patients (incremental group vs. full dose group) of the matched cohort

Outcome	No. of patients	No. of events	HR (95% CI)	p-value
Anuria	138	39	0.47 (0.24–0.93)	0.03
All-cause mortality	138	68	0.57 (0.33–0.98)	0.04
CV mortality	138	37	0.45 (0.21–0.99)	0.047

CI, confidence interval; CV, cardiovascular; HR, hazard ratio.
