Kim, et al. Optimal BP in Korean dialysis patients

Supplementary Figure 4. Pooled analysis for association between SBP categories and mortality risk without the present study.

Forest plots for (A) SBP of 120–140 mmHg vs. <120 mmHg, (B) SBP of 120–140 mmHg vs. 140–160 mmHg, (C) SBP of 120–140 mmHg vs. 160–180 mmHg, and (D) SBP of 120–140 mmHg vs. ≥180 mmHg were shown, respectively.

Cl, confidence interval; df, degree of freedom; SBP, systolic blood pressure.
